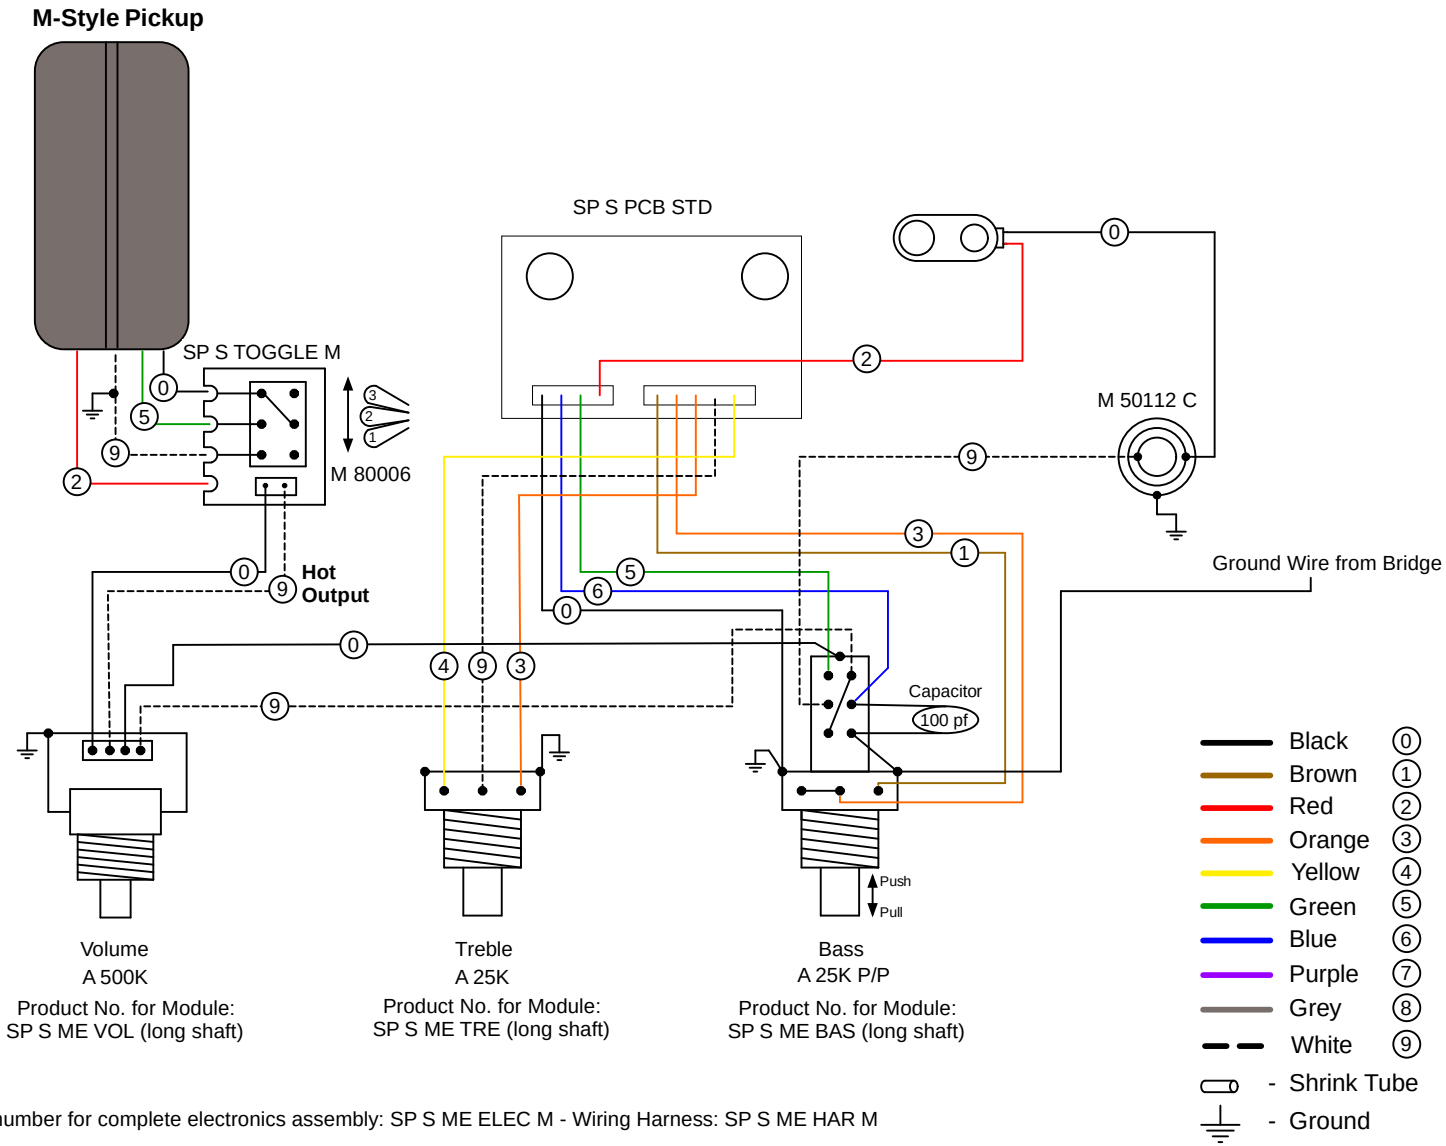
MetroExpress Onboard Bass Preamp (3-Knob System) M-Style

Master Volume / Treble / Bass (Push/Pull)



Article number for complete electronics assembly: SP S ME ELEC M - Wiring Harness: SP S ME HAR M

Sadowsky Onboard Electronics

Compatibility:

This electronics assembly is compatible with the following Sadowsky MetroExpress models:

- Sadowsky MetroExpress 21-Fret M-Style Bass

The controls are: Volume, Treble and Bass. Push/Pull on the Bass knob for preamp bypass.

Installation requires a side jack and a battery compartment. If not already done, we recommend shielding the control cavity and pickup cavities at the time of installation. We highly recommend installation by a professional guitar technician or luthier if routing and drilling is required for a battery compartment and/or side jack.

This system is not compatible with EMG or any other active pickups requiring anything other than a 250K or 500K volume pot. For these applications, please custom order a parts-only preamp kit and use your original volume pot.

The M-Style pickup should be wired to the 3-way switch as: Series (away from the player) / Parallel (towards the player) / Single Coil (middle). When in "Single Coil" mode, the coils closest to the bridge are active.
